

**For Immediate Release**

**Carpio's Partner Program Gains Rapid Momentum with Global Resellers**

*Carpio's GesFin™ CPM Suite to be sold and implemented by specialty performance management firms*

Raleigh, N.C., – January 5, 2009 – Carpio Solutions, a global provider of performance management solutions, announced 30 new partners signed up in 2008 to resell and implement Carpio's GesFin™ Comprehensive Management Suite as part of their go to market solution offerings. GesFin™ is a unified performance management application that provides control, accuracy, and agility to executives responsible for financial and operational business performance. GesFin empowers organizations to improve budgeting, planning, forecasting, workflow, reporting, financial modeling, scenario planning, profitability analysis, KPI monitoring, and financial consolidation. Carpio partners will be selling, implementing, and supporting GesFin for their respective clients with sophisticated performance management related needs. Carpio now has established reseller partners that specialize in performance management solutions in the USA, Argentina, Australia, Brazil, Bulgaria, Canada, Peru and Portugal.

"We are very excited about the number and quality of firms that have joined our partner program this year and are making investments in training their teams and introducing our product to their clients," said Marco Fregenal, founder and CEO of Carpio Solutions. "Most of our partners are also MicroStrategy and Microsoft partners and our GesFin CPM Suite is a native plug-in application for both of those BI Reporting platforms. There is a nice convergence occurring in the market place for Carpio and our network of partners to provide clients with comprehensive performance management solutions."

The list of organizations now authorized to sell and implement the GesFin™ CPM Suite include Southport Services Group, Mobile Software, Lancet Software, Intalign, Innova Consulting, BI Maven, Prime Consultants, Vision Management & Technologies LTD, C&C, DBC Company, COA and many others.

"As a leading US mid-market partner for MicroStrategy, we have quickly assessed the market demand for an integrated CPM and BI solution for our clients and after evaluating other products, it is clear to us that Carpio's GesFin CPM suite is a powerful and easy to use performance management application with unique functionality to address specific needs of the CFO's office," said Thomas M. Niccum, Ph.D, CEO of Lancet Software. "Clients we have introduced it to have been highly impressed and we are now in sales cycles that were not previously on our radar. GesFin is the perfect extension of our MicroStrategy BI practice to help us provide a business oriented CPM solution to our customers."

"My firm has been a specialist in the area of performance management solutions in Australia since its inception in 2004 and we have experience with all the leading BI and CPM players," said Martin Kratky, Co-Founder/Director of Intalign. "We completed a thorough review of GesFin and found that it has outpaced the competition in terms of functionality, ease of use, and value. We also liked that GesFin has optimized versions for MicroStrategy and Microsoft BI platforms since those are BI tools we utilize frequently. We are excited to add the GesFin CPM Suite to our recommended list of performance management solutions we can now provide to our clients. "
